## INTRODUCTION

This Report is produced from each Reserve Component's input to the Reserve Components Common Personnel Data System (RCCPDS) submitted under Report Control Symbols (RCS) DD-M(M) 1147 and 1148. For more information about RCCPDS, please refer to DoD Instruction 7730.54 (September 21, 1977).

The primary objective of the RCCPDS is twofold, that is, it provides a: (1) standardized and (2) centralized data base containing personnel information on all members of the Reserve Forces. Established in this fashion, the system has become the official source for Reserve Component strength (in July 1975) and the official source for accession/loss/reenlistment information (in July 1976). The information summarized and displayed in this Report reflects the official DoD position and as such it forms the basis for manpower planning, strength accounting and budgeting throughout the Department. Additionally, the information contained herein may be released to individuals and agencies outside the DoD.

It is important to note that the reliability of this information is only as good as the sources from which it was drawn. Therefore, it is essential for each Reserve Component to continue the purification of their data. This action will be directly reflected in the quality of information in this Report.

## NEWS

Selected Reserve Strength as reported on page 5 does not include all full-time active duty Guardsmen and Reservists. The inside front cover of this report reflects the addition of all full-time support personnel reported manually by each component.

The ARNG History Files have been changed as a result of our acceptance of a new December transaction file. This new December file consequently changes most of the fiscal year totals for the G1, G2, L2 and M1 charts. These changes were made at the request of the ARNG.

Many of our users have asked for an FY80 Summary Statistics Book that would be compatible with the last two that we have published. For this reason, we have reconstructed FY80 data and have put it in normal distribution. We hope this analysis tool is of assistance to our users.
